## Hawaii Fertility Program

### Greens and Tees Program

Timing	Rate	Bags/Acre	Product	Benefits
January	0.5 lb. N	5.5	8-3-5 Super Fine	Terrific color, slow even growth
February	0.5 lb. N	5.5	8-3-5 Super Fine	Terrific color, slow even growth
March	0.5 lb. N	5.5	8-3-5 Super Fine	Improved rooting
April (aeration)	1.0 lb. N	18	5-6-6 Fine	Reduces thatch and disease
May	0.5 lb. N	5.5	8-3-5 Super Fine	Excellent stress tolerance
June (aeration)	0.75 lb. N	14	5-6-6 Fine	Reduces thatch and disease
July	0.5 lb. N	5.5	8-3-5 Super Fine	Excellent stress reliever
August	0.5 lb. N	5.5	8-3-5 Super Fine	Excellent stress reliever
Sept. (aeration)	0.75 lb. N	14	5-6-6 Fine	Great prep for overseeding
Oct. (overseed)	1.0 lb. N	18	5-6-6 Fine	Quick germination and turf vigor
November	0.5 lb. N	5.5	8-3-5 Super Fine	Improved turf density
December	0.5 lb. N	5.5	8-3-5 Super Fine	Improved turf density
<b>Totals</b>	<b>3.5 lbs. N</b> <b>4 lbs. N</b>	<b>64</b> <b>44</b>	<b>5-6-6 Fine</b> <b>8-3-5 Super Fine</b>	<b>For Greens and Tees</b>

**Tees and Surrounds:** Tee applications should be made at 0.5 lb. to 1 lb. N per month during the growing season. Nature Safe's 8-3-5 (5.5-11 bags/acre/lb. N) or 10-3-10 (4.5-9 bags/acre/lb. N) is also recommended. The 5-6-6 (9-18 bags/acre/lb. N) is great when aerating tees. You can expect to see the quickest turf recovery on par 3s and driving ranges.

**Summary:** Programs can be adjusted to meet individual preferences. A more aggressive program of 1 lb. N per month will yield excellent results. Additional benefits of all programs include slow, even growth delivering improved turf health and vigor for excellent stress tolerance and water management benefits.

**Application Guidelines:** 1) During aeration, harvest cores, apply Nature Safe, top-dress and then drag into aeration holes. 2) After application water lightly, allow to dry completely; that evening run a full watering cycle (Wet-Dry-Wet Procedure). For the next two mowings remove baskets for the highest efficiency and performance.

**Fairways Program:** Fairway applications of 21-3-7 with UFLEXX™ (4 bags/acre/lb. N) or 15-2-8 with methylene urea (6 bags/acre/lb. N) or 10-2-8 (9 bags/acre/lb. N) for closely mowed fairways. For tournament golf use 10-3-10 with methylene urea (9 bags/acre/lb. N). 10-2-8 and 10-3-10 give you the benefits of an organic, while providing denser turf with deeper roots and slower top-growth. Always apply 1 lb. N (any formulation) for fairway aeration. Punch holes then drag in. The enhanced microbial activity helps decompose thatch providing excellent water and disease management benefits.

Make applications every 8-12 weeks, or 14 days prior to tournaments, for turf color, density, root growth, and stress reduction through improved soil agronomics.

### Special Offer

Orders of at least 2 tons qualify for participation in the **Nature Safe Sign Program** ([click here for program](#)).
