Source of Nutrients:

Hydrolyzed feather meal, meat meal, blood meal, and sulfate of potash.

*This product contains 8.0% slow release nitrogen from hydrolyzed feather meal and meat meal.

General Information:

Nature Safe 9-0-9 is formulated as a highly concentrated fertilizer providing excellent root and shoot stability with controlled plant growth. It is well suited for areas of nitrogen and potassium deficiencies. Nature Safe 9-0-9 contains various meat by-product meals which provide nitrogen that will slowly release over a 7-8 week period. Carbohydrates in the form of simple sugars and starches will stimulate microbial activity. Humus has been added to improve Cation Exchange Capacity (CEC), buffer the soil against extreme salt concentrations and improve soil structure for tolerance during heat and drought conditions. Nature Safe 9-0-9 is non-burning and very low in salt. Virtually all of the product is utilized through complete plant uptake, minimal leaching and volatilization. Nature Safe acts as a sponge in retaining moisture and nutrients for plant use, especially in sandy soils.

Directions for Use:

Established Turfgrass: Use as a topdressing for tees, roughs and fairways or any established turf. Apply 5.6 to 11.25 lbs. per 1,000 sq. ft. (0.5 to 1 lb. actual N). Results are enhanced during aeration. Covers from 5,000 to 10,000 sq. ft.

Coarse grade: Suggested for use on turf mowed at heights over 1/2".

New Turfgrass Seeding: Incorporate 11 lbs. per 1,000 sq. ft. into the top 2-4 inches of the seedbed before seeding or sodding. Covers 4,500 - 9,000 sq.ft.
